

### **The Impact and Effectiveness of Technology Education Programs**

1. Identification and development of heuristic, problem solving strategies.
2. Effectiveness of the modular approach to instruction in technology education.

### **The Effectiveness of Teaching Methods and Curriculum**

1. Characteristics of exemplary technology education programs.
2. Effectiveness of different approaches to teaching technology education.

### **The Impact of Technology Education on Basic Education Skills**

1. Integration of academics into technology education.
2. Impact of technology education on the math, science, and reading skills of elementary students.
3. Technology education as an integrator of academics.

### **The Impacts of Technology Education on Society and Culture**

1. The perceived value of technology education by high school graduates.
2. Value of technological literacy to the general public.
3. Social construction of technology: methods of developing student awareness.
4. Historical study of the impact of IA/TE on the education of American youth.

### **Promoting Diversity in Technology Education**

1. Determine the essential elements of technological literacy for all citizens.
2. Develop models to integrate diversity issues into the technology education curriculum.

### **Promoting the Image of Technology Education**

1. A developmental study to suggest a plan to promote technology education.
2. Determine successful strategies for improving the public image of technology education.

### **Addressing Teacher Supply and Recruitment Issues**

1. The supply and preparation of technology teacher education.

Figure#1. Categories and topics for research projects proposed by the Research Committee of the Council on Technology Teacher Education.
