

Points to Be Made

- Project 2061 is promoting science literacy through the reform of education in natural science, social science, mathematics, and technology.
- A thorough understanding of science literacy and learning goals is essential for effective teaching.
- Study and use of *SFAA* and *Benchmarks* can increase users' science literacy.
- *Benchmarks* complements the science and mathematics *standards*.
- Use of *SFAA* and *Benchmarks* can inform the design of activities for science literacy curricula.
