						World V		A The Scientific World View	뀌	
							┨		╞	
	1A	.15	ne Si	cientif	ic '	World		though most students believe that scientific knowledge	F	
	. ·							anges, they typically think changes occur mainly in facts		1
	A scientific world view is not s and mostly through the invention of improved technology									
	They just do science. But und for observation and measurement. They do not recognize									
	nonscientists. One is that by w that changed theories sometimes suggest new observations world works. Another is that t or reinterpretation of previous observations (Aikenhead,									
	studyn	-	-					987; Lederman & O'Malley, 1990; Waterman, 1983).		
	stable	anu	suoj			lange.			<u>+</u>	
	T ittle i	Little is gained by presenting these beliefs to students as dogma. For one thing, such beliefs are								
	subtle. The first one cited above says only that scientists believe that the world can be									
								e so completely understood that science can shut down once
